Four Ways to Find Student Reports

#1 STUDENT REPORT
- Use the Find Students menu.
- Select a student.

#2 STUDENT SEARCH
- Make your selections in the Student Search menu.
- Click Submit.
- Select a student.

#3 CUSTOM STUDENT REPORTS
- Create or select a Custom Student Report.
- Select a student.

#4 PROJECTION SUMMARIES
- Make your selections to open a report.
- Click on the number of students in a category.
- Select a student.

VVAAS Student Assessment Summary

Tests and Subjects
Filter subjects in all data tiles
- ☑ SOL
- ☐ PALS

TESTS AND SUBJECTS FILTER
Use the drop-down menus to select and deselect tests and subjects to customize your data views. Your selections impact what is available on every tile in the report.

Data Tiles
- Testing Information
- Student Projections
- Growth History

DATA TILES FILTER
Use the switches to turn specific data tiles on and off in the report.

Features of the Student Report

PROJECTIONS AT A GLANCE

View all of a student's available projections together.

Tests and Subjects	Grade	Probability of Reaching or Exceeding the Indicated Performance Level or Benchmark		
		Fail/Basic	Pass/Proficient	Pass/Advanced
SOL Mathematics	7	99.9%	86.3%	0.4%
SOL Mathematics	8	99.7%	76.5%	0.5%
SOL Reading	7	99.9%	81.3%	3.0%

Tests and Subjects	Grade	Probability of Reaching or Exceeding the Indicated Performance Level or Benchmark		
		Fail	Pass/Proficient	Pass/Advanced
SOL Science	8	100.0%	82.2%	0.5%
SOL Writing	8	100.0%	65.3%	3.9%
SOL Civics and Economics	N/A	100.0%	88.9%	7.5%

VIEW RESULTS ACROSS TIME

Examine students' testing history, past expected, and future projected scores.
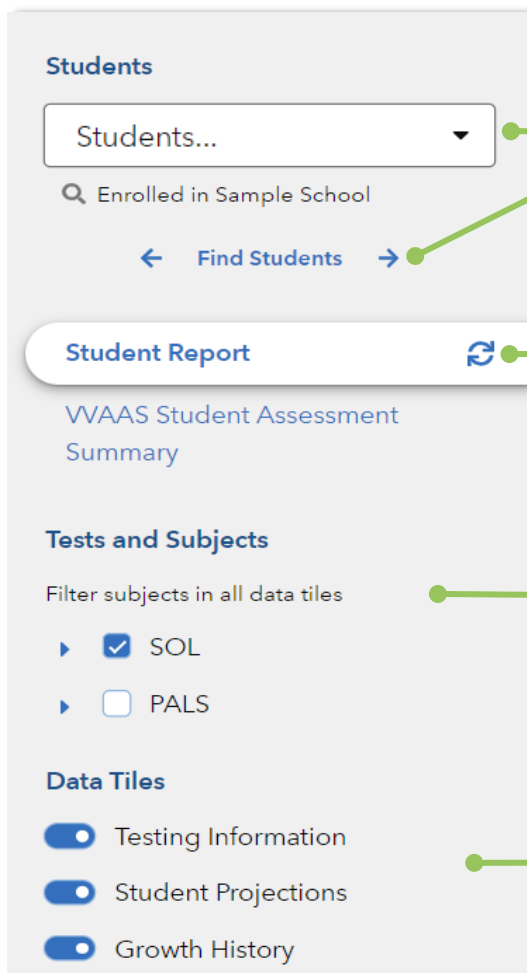

Growth Across Time

I want to know…

A specific student's testing history in Reading	
A student's testing history in Math, along with their projected performance level on the upcoming Math assessment	
How to view all of the available projections for a student	
How a student was expected to score last year compared to how they actually scored	
If a student might have had limited access to effective instruction in the past	

## What do I click?

A specific student's testing history in Reading
⇒ In the **Reports** menu, select **Student Report**
⇒ In the filter panel to the left, click **Find Students** to search and select a student
⇒ On the **Testing Information** tile, select **Reading** as the **Focus Subject**

A student's testing history in Math…
⇒ On the **Testing Information** tile, select **Math** as the **Focus Subject**
⇒ Under **Growth Across Time**, select **Future Projected**
⇒ In the **Projection** drop-down menu, select the upcoming Math assessment

How to view all of the available projections
⇒ Use the filter panel to the left to select all options under **Tests and Subjects**
⇒ Turn off all **Data Tiles** except **Student Projections**
⇒ In the **Student Projections** tile, click **View All Subjects**
⇒ Scroll down as needed

How a student was expected to score…
⇒ Click refresh ⟳
⇒ In the **Testing Information** tile filter, select **Past Expected** from the **Growth Across Time** menu
⇒ Select the year using radio button below the graph

If a student might have had limited access…
⇒ Click refresh ⟳
⇒ Turn off all **Data Tiles** except for **Growth History**

What will I see?

You will see a graph with the student's testing history in Reading. There will also be a table below the graph containing the students' full testing history.

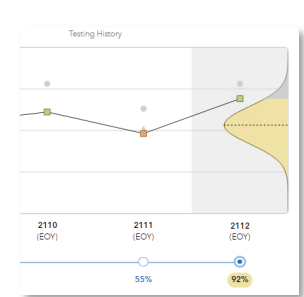

You will see a graph of the student's testing history in Math plus a colorful display with the most likely performance and the probabilities that they will meet or exceed each level.

You will see all of the student's available projections to upcoming assessments, along with filters that allow you to narrow your focus as needed.

You will see a bell curve with the student's expected score in the center and their observed score on the line graph. Below the radio button is the percentile of that observed score within their expected score distribution.

Depending on your account permissions, you will see the Growth results for the student's division and school by test and subject.

What do the data tiles tell me?

Testing Information

This data tile appears at the top of the default view and provides information about the student's testing history. The tile filter also provides the following Growth Across Time options:

- **None Selected**—displays a student's testing history.

- **Past Expected**—adds a bell curve representing the student's expected score on a center dotted line enabling you to compare that with the student's observed score. Expected scores were determined after the student tested using the student's testing history and the student's own cohort's statewide data.

- **Future Projected**—adds a bell curve representing the students most likely score on a center dotted line enabling you to compare that with the color-coded backdrop of all possible performance levels. Their probabilities of meeting or exceeding each performance level or benchmark are listed along the right side of the graph.

Student Projections

This is the second tile displayed on the default report. It provides a reliable indicator of the student's likelihood of reaching or exceeding future performance levels or benchmarks. It is based on the student's past performance on assessments across subjects.

Growth History

This is the third tile displayed on the default report. Depending on your account permissions, it displays the division and school growth measures at the time the student was connected to them.
